

Calusa Country Club documentary update

13 October 2026 | English update to the retained map and atlas

Current source rows for Timers 2, 9 and 13 have been reconciled with existing exact-address records. Conch Drive common descriptions were refreshed without map points. Three 18911 Scallop references remain unlocated; repeated Timer 4 zone 53 is flagged for reconciliation.

T CC 4 r5	4 / 54	Scallop 18911	S

Scallop caution: 18911 shares parcel/address geometry with other records, so zones 55 D, 53 S and 54 S are retained as unlocated references. Timer 4 zone 53 also lists 18917 Scallop, which is flagged rather than resolved by assumption. No new lot boundary is drawn.

How to use the retained pages

This dated update takes precedence for the listed documentary references. All original map and atlas pages are retained as the earlier snapshot. Their printed colors, reference labels, row citations and totals are historical; use this update and the interactive map for the revised records. Other previously documented uncertainties remain in force.

Parcel geometry is unchanged. Documentary associations are not hydraulic boundaries or proof of physical controller, valve or pipe locations. Current controller programs and operating schedules have not been verified.
